

SPONSORSHIP OPPORTUNITIES

**Developing
Tomorrow's
Leaders...
Today**

The goals of the AUVSI Foundation and the U.S. Office of Naval Research's student competitions are to challenge a new generation of engineers to design and build autonomous systems capable of performing realistic missions, and to foster ties between young engineers and the organizations developing these technologies.

A number of organizations in the field — government and industry alike — have already discovered the benefits of recruiting the talented students that participate in these events. We invite you to become involved with the AUVSI Foundation's student competitions where you can meet the brightest minds preparing to enter the unmanned systems community. You may even get the chance to hire them!

GOLD SPONSOR

\$7,500
