

Kyutech Underwater Robotics: TEAM BIOGRAPHY

Kyutech Underwater Robotics team is a group of researchers, students and teachers under Ishii Laboratory at Kyushu Institute of Technology, Japan. This team was the first Asian team to join RoboSub Competition, and still the only Japanese team involved in it. We are specialized in creating underwater vehicles and studying their behavior. Our team members come from different countries and have different background and knowledge. The team consists of 12 members. Among these members there are people from Canada, Korea, Syria, Italy and Japan. We are specialized in Machinery, Circuitry and Software development and the team is divided into the following groups: Mechanical, Electrical and software, but it is structured in order to make all the members share the knowledge from the various groups.
